CHESS TOURNAMENT
REPORT

Organized by
GHRISTU Chess Club – CHECKMATE

On
International Sports Day

Academic Year: 2026–27

1. Introduction

GHRISTU Chess Club – CHECKMATE is a student-oriented chess club established to promote chess as both a recreational and competitive activity among students of the University and College. The club provides an inclusive platform where students of different skill levels can learn, practice, play, and compete in chess.

The club aims to develop strategic thinking, problem-solving abilities, analytical skills, concentration, decision-making, discipline, and sportsmanship through regular chess activities and competitions.

As part of its activities, CHECKMATE organized a Chess Tournament to encourage students to participate in a structured competitive environment and to provide them with an opportunity to demonstrate their chess skills.

2. Objectives

- To promote interest in chess among students across the University.
- To provide opportunities for students to learn and improve their chess skills free of cost.
- To develop strategic thinking, analytical abilities, problem-solving, and decision-making skills.
- To encourage healthy competition, sportsmanship, discipline, and teamwork.
- To organize chess activities at the college and inter-department level.
- To provide students with opportunities to participate in inter-college and higher-level chess events.
- To identify talented chess players and encourage them to represent the University in competitive events.

3. Why Was CHECKMATE Started?

CHECKMATE was started with the aim of creating a dedicated platform for chess enthusiasts within the University. Although many students are interested in chess, they may not always have a structured environment where they can regularly practice, learn new concepts, interact with other players, and participate in organized competitions.

The club aims to bridge this gap by bringing interested students together and providing regular opportunities for learning, practice, competition, and interaction through chess. Chess is also used as a medium to encourage logical thinking, strategic planning, concentration, decision-making, patience, discipline, and sportsmanship.

4. Plan

CHECKMATE follows a structured plan throughout the academic year.

Activity	Plan
Weekly Sessions	Regular chess sessions every Saturday from 10:00 AM to 1:00 PM, including practice games, learning sessions, game analysis, discussions, puzzles, and strategy activities.
Monthly Competitions	Monthly internal chess tournaments to provide regular competitive experience and identify talented players.
Online Chess	Online chess tournaments and contests through platforms such as Chess.com and Lichess.
Inter-Department & Inter-College Events	Competitions involving students from different departments and institutions to provide greater competitive exposure.
